Responsible Exotic Animal Ownership

People Who Claim Pet Exotic Birds are 'Stolen' From the Wild Don't Have a LEG TO STAND ON!

FACTS- According to
Avicultural Society of
America (ASA)

*Nowadays, pet birds came
from birds owned, cared for
and bred in captivity by an
aviculturist.*

*It is projected that 25% of
wild bird species will
become extinct this
century.*

*Imports of wild-caught
parrots into the U.S.
for the pet trade have been
banned since 1992.*

*Thanks to captive breeding
many species that are
facing extinction in the wild
are thriving in the United
States.*
